

Fuel Card

How does a fuel card or fleet card work?

Just like a **credit card** that can be used to purchase fuel at specific locations.

The driver is given a card with a unique pin number to make work-related purchases.

Once the driver fills up, the cost is charged to the account linked to the card, and the amount owing will be automatically deducted from your bank account or credit card.

Benefits of Fuel Cards

Considerable discounts on fuel

Track purchases

Detailed reports

Enhanced security and fraud prevention

Food and drink discounts

Reward programs

Considerations

Be aware of the fine print when it comes to promo periods.

Understand which discounts apply to which fuel stations

Be mindful of transaction fees as well, as they can offset some of your discounts.

The larger your fleet size, the more attractive you are as a customer to fuel providers.
